

Java Test Engineer (M/F)

If you are an experienced Java *Test Engineer*, looking for new opportunities to practice and develop your talents, take a look at our Company Profile: Steria is the place for you.

Your Mission

You will be a member of the new Steria Benelux Agile Development/Skill Centre based in Luxembourg.

You will initially be integrated into international projects for the European Commission, involving team members from Steria Europe (Steria Spain, France, Benelux, UK, Germany, etc.) based at multiple development sites.

You will test software releases and report the test results back to the developers, analysts and management.

You will create and maintain test cases and develop our test framework using Java.

You will configure hardware and operating environments as needed to complete assigned testing (Linux, Weblogic, Oracle).

You provide feedback to the development team and ensure the work is carried out in accordance with the schedule and the quality requirements.

Your Profile

You have several years of testing experience preferably with a thorough knowledge of structured test methodologies and processes. ISTQB certification will be an asset.

You will have first hand experience and knowledge of automated testing and test frameworks.

You must be familiar with back-end Java/J2EE development. A sound knowledge of XML is recommended.

You have working experience in test definition, test execution, reporting and bug tracking.

Ideally you have experience of the JIRA Issue Management tool.

You commit to quality, have proven problem solving skills and have a thorough approach to work.

You enjoy teamwork in an international environment - oral and written communication in English is a must.
